VILLAGE OF PLOVER FIRE DEPARTMENT

STANDARD OPERATING PROCEDURE

Policy Number:	1220	**Section:**	1200 LINE OPERATIONS
Subject:	Emergency Vehicle Operations		
Effective Date:	07/11	**Author:**	
Purpose:	To establish a consistent set of guidelines for all department members regarding emergency vehicle operations.		

Guideline:

While responding to a call in your Personally Operated Vehicle (POV), you must drive following all traffic laws and with due regard according to EVOC. EVOC training is periodically provided by the Department.

Red lights may be used for parking and scene marking for safety as per state statute. Usage of red lights for scene marking and safety can begin during the member's probationary period. All installed red lights in POV's must have approval of the Fire Chief or their designee before they are used in this capacity.

Any EMS member wishing to operate a Department owned vehicle (54C1, 54C2) in the emergency mode for EMS response is required to be checked off using the EMS 54C2 Training Qualification Check Off form in the Department owned vehicle by the Fire Chief or his designee.

No member shall respond to any emergency scene with any non-EMS personnel in their vehicle (i.e. family members, friends, neighbors, etc…).

Misuse of this fore mentioned guideline shall be reviewed by the Fire Chief for possible disciplinary action.
